

# Erwin Felix Lewy Bertaut Prize 2023

## Call for nominations

The **European Neutron Scattering Association (ENSA)** and the **European Crystallographic Association (ECA)** invite nominations for the **Erwin Felix Lewy Bertaut Prize 2023**.

**The Prize is awarded in recognition of notable experimental, methodological or theoretical contributions to the investigation of matter, using Crystallographic or Neutron Scattering methods.**

### Criteria

- Young scientist (up to 8 years after finishing the PhD thesis).
- To have a clear association with ENSA and/or ECA scientific communities.

### Nominations

- Submitted by individual European scientists (self-nominations are accepted) or on behalf of a group.
- Nominators may be members of ENSA, ECA or any of the national organizations represented by ENSA and ECA.
- The nominator must ensure a signed acceptance of the nomination by the nominee (not required for self-nominations).

### Nomination documents

- Letter of motivation for the award.
- Brief curriculum vitae of the nominee and list of publications.
- Letters of support from authorities in the field are accepted. In case of self-nomination, at least two letters are required.
- Nominations must be sent to ENSA Chair at the address: [henrik.ronnow@epfl.ch](mailto:henrik.ronnow@epfl.ch).

### Deadline

**February 15th, 2023**

### Award Venue

**European Conference on Neutron Scattering 2023 in Munich, Germany**

The prize winner will have the opportunity to present his/her work, *Bertaut Prize Laureate Presentation*, at the Award ceremony. Nominations for the prize will be treated in confidence and, although they will be acknowledged, there will be no further communication.
